DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to a holder indicating to the token acceptance device that the electronic coupon is to be redeemed and applied to the transaction, classified in class, 705 subclass 14.
 - II. Claims 23-43, drawn to determining if there is a conflict between an electronic coupon and a paper based coupon, classified in class 705, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as determining if there is a conflict between an electronic coupon and a coupon based coupon and group I has a separate utility such as a holder indicating that the electronic coupon is to be redeemed for a transaction. See MPEP § 806.05(d).
3. These inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Since the examiner knows from past experience that an election will not be made by telephone, this restriction is proper under MPEP 812.01.
